MADE IN EU - POLAND

Private-label manufacturer

Carry Pet Food is the only producer of pressed dog chews in Europe. We have more than 30 years of experience in the pet food market.

We're a private-label manufacturer of dog chews made from beef, horse, and deer rawhide as well as salmon and cod skin. If you already have a pet food brand or are currently planning one and want to create a unique product line for it, Carry Pet Food is the partner you're looking for.

01

Idea

If you already have an idea for your chews, give us some details so we can help you with production and marketing. If you're still not sure what kind of chews you want, give us a general idea, including SKU range, breed sizes, and packaging, and we'll use that information to create an awesome range of chews and provide you with all the support you need.

03

Samples

Once the details have been worked out with our technologist, we'll prepare samples so you can see if the product is a good fit for your portfolio. We can also conduct palatability and acceptance testing among local breeders.

Don't forget the packaging!

This is where you finalize your packaging. If you want to get people's attention, you need quality packaging that looks sharp and stands out in the store. After all, the packaging is the first thing they see when they encounter your products, so it's a key component of your marketing strategy.

02

Development

Price doesn't have to be your only competitive advantage. Market analyses have shown that strong brands are built on strong products backed by a strong story. Give us a little time, and we'll build you a strong brand that makes an impact.

04

Production

When everything is ready to go, we'll start making your products and packaging. From here, it's only a few weeks until you receive your chews.

Have no fear – our expertise and experience will ensure the entire process is as smooth and efficient as possible.

Create your own product

Use the handy product generator on our website to quickly configure chew products that are just right for your brand.

Extensive experience, uncompromising quality

We use only high-quality natural ingredients in the production of our dog chews, and all of our suppliers must meet a variety of exacting quality standards.

We operate state-of-the-art production facilities that are subjected to regular veterinary and sanitary inspection. In addition to modern automation, some of the steps of the production process are done by hand, such as rolling the raw chews and weighing them prior to drying

Strict adherence to good manufacturing practices (GMP, GHP) ensures that the safety of our operations is on par with human food manufacturing.

Our dog chews

We specialize in the production of dog chews made from beef, horse, and deer rawhide as well as salmon and cod skin. Our portfolio comprises a unique VEGE line, pressed bones with filling, chew sticks, and rolls. We offer our customers a wide range of sizes, shapes, colours, and additional ingredients, such as meat, fruit, functional additives, and more.

Beef rawhide

Rawhide is a natural source of animal protein and collagen. Excellent palatability is ensured thanks to a filling made with tripe and bull pizzles. The chews are produced without the use of any adhesives.

Fish skin

Salmon and cod are rich in omega-3 and omega-6 polyunsaturated fatty acids, both of which strengthen the immune system.

Deer rawhide

We recommend chews made from deer and horse rawhide for dogs with various food intolerances and/or allergies, such as pork. These monoproduct products eliminate the risk of allergies while providing good fun and oral hygiene at the same time.

Horse rawhide

VEGE

A meat-free chew created to add variety to your dog's diet. Plant protein is rich in nutrients, trace elements, and carbohydrates and makes an excellent complement to meat-based diets.

DOG CHEWS

Beef rawhide

Characterized by excellent palatability, chews made from rawhide with added tendons and bull pizzles satisfy the taste buds of even the most discerning dogs.

DOG CHEWS

Rawhide

With quality ingredients and careful processing, chews made from beef rawhide satisfy dogs' natural chewing instinct while providing many nutritional benefits.

Our chews are created with passion without the use of preservatives or added sugar. They're completely free of gluten and chemical substances, and because the filling contains no sharp pieces that could injure dogs while chewing, they're also entirely safe.

The use of natural additives means excellent palatability and digestibility are guaranteed.

DOG CHEWS

Fish skin

Fish chews are made with the skin of various fish species, most commonly salmon and cod. Due to their structure, these chews are exceptionally tough, making them the perfect choice for long-lasting and satisfying chew sessions.

The naturally occurring polyunsaturated omega-3 and omega-6 fatty acids in fish are widely recognized for the numerous nutritional benefits they provide, namely their role in supporting strong nails and a healthy, shiny coat with reduced shedding.

These essential fatty acids also have a positive impact on the nervous, immune, and circulatory systems.

DOG CHEWS

Horse rawhide

Ideal for dogs with food allergies.

Horse rawhide chews can be given to all dogs regardless of age or breed.

Horse rawhide is relatively low in fat and has a delicious aroma that dogs love.

Because there is little likelihood of allergies, these chews make an excellent snack for dogs prone to food allergies and those with sensitive stomachs.

DOG CHEWS

Deer rawhide

Ideal for dogs with food allergies.

Deer hide is naturally rich in protein and low in fat.

Unlike other chews, such as those made from beef rawhide, these products are hypoallergenic and easily digestible, making them an ideal alternative for dogs with sensitive stomachs.

They're also low in calories and practically fat free.

DOG CHEWS

VEGE

In recent years, more and more people have been choosing a vegetarian or even a vegan diet for their dogs. VEGE chews are healthy, tasty snacks that meet a wide range of canine dietary needs while also caring for the environment.

VEGE chews for dogs are the answer to a variety of needs, such as demand for products made with natural, environmentally-friendly ingredients. We've developed this special line of chews using vegetables that commonly appear in traditional Polish cooking, such as parsnip, potato, and carrot.

Parsnip - rich in vitamins and minerals, supports digestion and the immune system

Potato - a source of fibre that helps maintain proper digestive function

Carrot - an excellent source of vitamin A, which supports eyesight and the immune system

Because they're low in calories and high in fibre, VEGE chews are also ideal for dogs with special weight management needs.
